EXPERIENCE

E-Commerce - Front End

React.js - Redux - JavaScript - Html - Css - Bootstrap

Responsive E-Commerce built on React.Js using mobile first philosophy with an API to access the database. React Bootstrap was used to develop the website environment. A main page was created as well as a detailed one for each product, a functional shopping cart, product filtering by category or price, purchase history, log in and sing up.

Pokedex - Front End

React.js - Redux - JavaScript - Html - Css

Responsive Pokédex developed with the mobile first philosophy and using an API for the database. All the paginated Pokémon were listed, a search engine and a filter by categories were created. A quick view card and a dynamic detailed card were created, each Pokémon is shown in the color of its main type.
